Sofiia Matsiutsia

Senior Product Designer based in London

Turning complex workflows into intuitive products. Owns **design end-to-end**, from user discovery and problem definition to production. Combines systems thinking, rapid iteration, and close engineering collaboration to solve operational challenges and deliver measurable business impact.

2025–Present · London / Global

Co-Founder and Design Lead · Vibe Coding Collective

- Co-founded an **AI education community** active in 10 countries, led collaborations with ElevenLabs, Vercel, v0, Lovable, Softr, MacPaw.
- Researching **Human-AI workflows and adoption** patterns with a PhD researcher in the field.

2022–2026 · Rotterdam

Senior Product Designer · HousingAnywhere

- Owned **end-to-end UX** of a business-critical platform, unifying 5 fragmented tools into workflows for 200+ employees.
- Identified and automated high-friction operational workflows, **saving 30+ hours per week** and **reducing manual work by 75%**.
- **Led field research** across 10+ workflows, using interviews, shadowing, and service blueprints to uncover root causes and opportunities.
- Redesigned landlord payout experiences serving thousands of users, simplifying complex financial workflows.
- Secured executive investment in platform modernisation through a KPI-driven business case, partnering with Engineering to establish reusable design patterns.

2022–2023 · Consulting project

Founding Product Designer (AI) · TeamLift

- Independently led **0-to-1 product design for an AI-powered talent mobility platform**, translating a skills-graph ML engine into intuitive workflows and contributing to a successful fundraising round.
- Partnered with the Head of AI and Engineering to **prototype human–AI interactions**, translating ML capabilities and limitations into testable product concepts.

2021–2022 · Kyiv

Growth Product Designer · Flatfy (LUN)

- Owned product design for a property platform serving **5-10 million monthly users**.
- **Increased filter usage by 19%** and e-commerce **conversion by 3.6%**.
- Investigated ML limitations and confidence levels in duplicate and fraudulent listing detection with Data Scientists and Engineers to translate the best version into the design decisions.
- Led the nimble cross-functional team as Product Owner for three months, partnering with the CEO and Team Lead to prioritize high-ROI features while advocating for users' experience.

2019–2021 · London / Kyiv

Product Designer · 90POE / Zodiac Maritime

- Designed data-dense fleet **operations platform from 0→1**, integrating **real-time data, interactive maps**, **and monitoring dashboards** to reduce operational decision-making time from hours to seconds.
- **Led field qualitative research** with vessel captains and crew, mapped workflows, built reusable monitoring patterns within a token-based design system.
- Led redesign of vessels' Digital Twins visualisation, and cooperated with the Data Science squads to understand ML capabilities and limitations for bringing it into the platform.

2018–2019 · Kyiv

Web Designer · Sterling

- Designed websites for client projects, presenting work directly to clients.

System architecture

Workflow architecture
Business rules and exception handling
Complex interactions, operational UX
Backend-driven workflows
Technical constraints and feasibility

Design

User-centred design
Data-informed design
Data-heavy interfaces and visualisation
Design systems, tokens, components
AI workflows, intent-based interfaces
Visual design and interaction

Research

Field research, shadowing, interviews
Root-cause analysis
Service blueprints, BPMN
Usability testing, A/B testing

Leadership

Product vision & strategy
End-to-end ownership & delivery
Business and user impact
Cross-team collaboration

Tools

Figma, Paper, Figma Make, Claude Code, Codex, n8n, Media generation
HTML, CSS

Education

BSc Systems Analysis and Cybernetics,
Kyiv Polytechnic Institute

MSc Marketing,
Kyiv NUFT University
